

## 2012 Jeep® Wrangler

### Technology Keeps Customers Connected, Informed, Entertained and Focused on Driving

- **2012 Jeep® Wrangler features Voice Command and steering wheel controls that allow drivers to operate vehicle systems**
- **Life-simplifying connectivity features keep customers connected and mobile**

The 2012 Jeep® Wrangler and Wrangler Unlimited feature the latest in vehicle technology with Uconnect® systems, including Voice Command with Bluetooth® to control handsfree calling, streaming audio, navigation and SiriusXM Satellite Radio. Wrangler's Uconnect systems give drivers control at their fingertips with intuitive buttons on the front and rear of the steering wheel. These easy-to-use controls allow drivers to keep their hands on the wheel and eyes on the road.

"Jeep Wrangler features technology to keep adventurous customers connected," said Marios Zenios, Head of Connectivity and Infotainment — Chrysler Group LLC. "For 2012, Jeep delivers more technologies to give Wrangler customers the ability to safely stay connected to the outside world, even when on the trail."

#### **The following Uconnect features are available in the 2012 Jeep Wrangler and Wrangler Unlimited:**

##### **Bluetooth Streaming Audio**

Owners can link their Bluetooth-compatible phone, media player or iPod® to wirelessly stream audio through the Uconnect Media Center to the car audio system. This new feature means there's no need for special plugs or wires, allowing owners to seamlessly connect to music and communications.

##### **SiriusXM Satellite Radio**

SiriusXM Satellite Radio provides Jeep customers with more than 130 channels of the best music, entertainment and information coast to coast, featuring the latest enhanced features such as Instant Replay, Song Alert and Game Alert. SiriusXM Satellite Radio offers more than 60 commercial-free, CD-quality music channels and 60 channels of sports, news, entertainment and children's programming, 24 hours a day. Regional traffic and weather reports also are included with SIRIUSXM Satellite Radio. Selecting favorite radio stations is easy. Passengers are able to scan channels with steering wheel controls, utilize pre-set touchscreen buttons, select a station with Uconnect Voice Command (e.g. "Tune to The Pulse"), or let Song Alert notify when a favorite

artist or song is playing. In addition, they can search both by music category and channel, which is displayed on the radio screen.

### **SiriusXM Travel Link**

SiriusXM offers real-time location based services that work in conjunction with the available premium navigation system. SiriusXM Travel Link brings a wealth of useful information into the vehicle and right to the occupants' fingertips:

- **Weather** – Check variety of local and national weather information from radar maps to current and five-day forecast
- **Fuel Prices** – Check local gas and diesel prices in the area and route to the station of choice
- **Sports Scores** – In-game and final scores as well as weekly schedules
- **Movie Listings** – Check local movie theaters and listings in the area and route to the theater of choice
- **Ski Info** – Find out ski conditions at favorite hills

### **Uconnect Media Center**

The innovative Uconnect Media Center offers a 6.5-inch touch-screen and voice command for convenient control of multiple media sources. Owners can create a personalized in-vehicle media experience with an auxiliary jack for MP3 player input, through a USB port for streaming music and device charging or with SiriusXM Satellite Radio. The Media Center also includes a hard drive where music and photos can be uploaded. In addition to navigation software and mapping, the hard drive holds tens of thousands of songs. Finally, for the driver who needs efficiency, a voice-memo recorder feature allows convenient reminders up to three minutes long.

### **Uconnect Web**

Uconnect Web provides high-speed internet access by combining WiFi and 3G cellular connectivity. The system transforms the vehicle into a mobile “hot spot” to deliver uninterrupted internet access for passengers, even while the vehicle is in motion.

### **Uconnect Navigation**

Uconnect Navigation offers customers reliable, seamless use of what has become a necessary technology and Wrangler offers two navigation solutions. Garmin® and Chrysler Group LLC have teamed up to bring consumer-friendly navigation. The Garmin navigation radio is designed with simplicity in mind. With just a glance, you can get visual navigation cues while you stay focused on driving. Key navigation features include Lane Assist and Junction View, speed limit information, map data, including United States, Canada and Mexico, and more than six million points of interest with the intuitive Garmin user interface.

Available Uconnect Navigation is an enhanced system that combines the features of a global positioning system (GPS), which is integrated with the vehicle sensors, for accurate positioning even when GPS signals are temporarily interrupted. Voice Command and touch-screen allow easy operation. If the vehicle is in motion, destinations can be entered via Voice Command for on-the-go directions. The robust points of interest database make it easy to find nearby restaurants, shopping, hospitals or other local destinations. Drivers also can avoid traffic jams with SiriusXM Traffic.

### **Uconnect Voice Command**

Uconnect Voice Command is an advanced voice recognition system with Bluetooth wireless technology. The system works with most Bluetooth-enabled phones, MP3 players and USB drives. Uconnect Voice Command gives drivers “handsfree” operation of phone and radio station choice. The built-in phonebook automatically downloads as many as a thousand phone book entries from supported phones, which can then be selected by simply saying a contact name. This feature option promotes safety, freedom, value and flexibility.
